SKILLS SESSION - by Ann Muir ..... 41

This Skills and Drills manual has been developed to support coaches as they increase the hours of training that players participate in. To improve the quality and consistency of performance at all levels coaches need to be encouraging players to attend regular training sessions. To make this both developmental and fun coaches need to be able to provide planned sessions that contain purpose and variety.

Thanks go to Roger Munro for the work he put into developing this resource. Ann Muir has added value by providing a circuit training session that she has used with the players she coaches. Other ideas for this manual have also been provided by coaches in New Zealand as well as the "Queensland Bowler" and we thank all those that have assisted in this way.

If you have other Skills \& Drills that you use please get them to me we want to continue to grow this size of this manual.

The manual has 4 sections:

1. Skills

A series of skill drills from the basic "draw" shot through to the more advanced shot selections.
2. Charts

For each of the skills being used there is an accompanying "record chart" for that exercise which allows the bowler to keep accurate records of their training and progress.
3. Games

Included are basic ideas for games that may be used to further coaching whilst maintaining interest. There are also progressive games contained in the skills section. Further games may be added from time to time.
4. A Circuit

Circuit Training is the best way to provide that competitive edge that players want to develop.

Good luck - and go Coach!
Remember that "Coaching is the KEY!!"

BASIC SKILL No 1

Skill drill: Jack delivery \& first bowl effectiveness DELIVER JACK TO F EACH TARGET "X" DELIVER BOWL TO FII ISH CLOSE TO JACK

BASIC SKILL No 2

BASIC SKILL No 3

BASIC SKILL No 4

2m

Skill Drill: The Draw \& Controlled Forcing Shot DRAW TO BOWL AT RINK CENTRE THEN PLAY CONTROLLED FORCING SHOT ( 2 m THROUGH) TO OFF LINE BOWL.

BASIC SKILL No 5

## SKILL EXERCISES 1 TO 4

## SKILL EXERCISE No 1 INTRODUCTION

- Delivery to Line
(The "Warm up drill")

The warm up drill, using two discs placed along the intended delivery line is fully described in the six session training manual. It is one of the few training skills used where the outcome is not important as emphasis is placed on the bowlers delivery action.

Coaches can use this skill session to good effect by checking each players delivery technique for errors and consistency.

This drill also allows the new bowler to draw along a definite line without the pressure of having to determine the imaginary line from the bank.

Throughout each session the coach can work with each player to develop their individual delivery movements along the desired line.

The skill can be assessed at all stages -

1. the Pre shot routine.
2. movement onto the mat
3. the mat drill
4. the delivery action
5. the follow through.

## SKILL EXERCISE No 2 DRAWING

A PROGRESSIVE SKILLSDRILL
This drill allows the consistency of each player taking part to be monitored in their execution of the draw shot including their first

## bowl effectiveness.

This is usually a two bowl exercise. Three players per rink. Bowls are played in turn to a placed jack where the intention is for the players to draw as close as possible. Results are recorded on each rink as follows:-

## Scoring and Progression

The player that has the closest bowl (to the jack) removes both of their bowls and moves up one rink.
The player with the furthest bowl removes both their bowls and moves down one rink.
The remaining player stays on that rink for the next round.
On end rinks the following applies: for the top rink - only the player with the furthest bowl moves (down). On the lowest rink only the player with the closest bowl moves (upwards) maintaining 3 players per rink.

This skill will show those players with a good consistent draw who will mostly finish at the top end each time. It also allows coaches to track those players who are stronger on one hand as well as indicating "first bowl effectiveness" and Line Speed corrections.

In the example the red bowl is closest $\mathbf{C}$
The blue bowl is in the middle $\mathbf{M}$
Has finished the farthest $\mathbf{F} \bigcirc$

## Example chart:

|  | End | F/H | B/H | C | M | F | Scoring bowl New rink |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | X |  | X |  |  | 1 |  | 3 |  |  |
| 2 | $X$ |  | $X$ |  |  |  | 2 | 4 |  |  |
| 3 |  | $X$ |  | $X$ |  |  | 2 | 4 |  |  |
| 4 | $X$ |  | $X$ |  |  | 1 |  | 5 |  |  |

## For above chart entries:

| $1^{\text {st }}$ End | Played Forehand Closest | $1^{\text {st }}$ bowl scored | To rink 3 |
| :--- | :--- | :--- | :--- |
| $2^{\text {nd }}$ End | Played Forehand Closest | $2^{\text {nd }}$ bowl scored | To rink 4 |
| $3^{\text {rd }}$ End | Played Backhand Middle | $2^{\text {nd }}$ bowl scored | Stay rink 4 |
| $4^{\text {th }}$ End | Played forehand Closest | $1^{\text {st }}$ bowl scored | To rink 5 |

## SKILL EXERCISE No 3 LINE/SPEED ADJUSTMENTS

(Played same as the Progressive Drawing Skill use chart 7)

This drill allows for players consistency to be monitored in their ability to make small adjustments to Line and Speed.

This drill is played and scored in the same manner as the progressive drawing skill. The emphasis shifts to the ability of the player to make then necessary Line/Speed adjustments.

It is also practical for the player to draw to the new target from outside of the rink to return alive.
The player initially draws to the target $\mathbf{x}$ at rink centre then adjusts to the new target as positioned by the coach.

## Initial Target $\mathbf{X}$ or Adjusted Targets

## Note:

When using Chart 7 for this exercise record the result of the initial bowl under the Scoring bowl column with a tick or cross and then record the finish position of the adjusting bowl.

## Example:

End $\quad$ F/H $\quad$ B/H $\quad$ C $\quad M \quad F \quad$ Scoring bowl New rink

SKILL EXERCISE No 4

## a. Elimination of Short Bowls

Played as a normal game however players are penalised for playing short bowls.

As bowls come to rest - any bowl shorter than 30 cm (1ft) of the jack is immediately removed from the head. This penalty is also applied to any bowl finishing further than 2 metres beyond the jack.

The bowls that are removed CANNOT be played on the next end but are returned for play on the next end thereafter.

Example: A player who delivers two short bowls on the first end will loose these bowls for play on the second end and be required to sit out that end.
The player will then be permitted to play two bowls again on the third end and so on for the remainder of the game.

## b. Elimination of Narrow Bowls

Played the same as the elimination of short bowls game but players are this time penalised for playing narrow bowls.

As the bowls come to rest any bowl that has crossed the centre line of the rink by more than 1 metre (narrow) is immediately removed and CANNOT be played on the next end.

The bowls removed are available for play again after one end penalty is observed.

Example: A player who delivers two narrow bowls (either hand) on the first end will loose these bowls for play on the second end and be required to sit out that end.
The player will once again be permitted to rejoin the game on the third end as indicated for Short bowl elimination game.

## SKILL EXERCISES 5 to 9 (Thanks, Bruce Clark)

No jack is required for this exercise. Bowl your first bowl which becomes the jack. The next three bowls are bowled to the first bowl.

This is a good exercise to gain confidence in establishing line and length - the basis of the game.

## Skill Three: Drive

 one, draw oneIt has been said that this is the hardest combination of shots in the game but is undoubtedly a matchwinning skill. It is therefore essential to practice this discipline which is best done with the use of flapjacks. Place a flapjack bowl and jack about 15 cm apart to create the target. The first bowl is a drive which should hit the bowl. The second bowl is a draw to the jack. First two bowls on the backhand, next two bowls on the forehand.

## Skill Four: Off-line

 drawPlace a jack close to the edge of the rink and draw two bowls to the jack on the forehand and then draw the remaining two bowls to the jack on the backhand.

Skill Five: Playing through the wall
Set four bowls in an arc approximately one metre short of the jack. Play your bowls with sufficient speed to hit on to one of the bowls in the fence and then run on through for shot. A bowl that only reaches the wall is a bad bowl. This is an excellent exercise for playing through short bowls. It is best done with the assistance of a coach on the head.

## A 40 BOWL EXERCISE

40 BOWL SKILLS DRILL

1. Deliver the jack which is then centered
2. Deliver TWO bowls on each hand as indicated

## The 40 Bowl Skills Drill

(10 ENDS, 4 BOWLS EACH END SAME RINK)

## Use Skill chart No 5

1. The player lays the mat (length own choice) each end.
2. The player delivers the jack to their desired length - (record). (If out of bounds to be placed on the 2 m mark)
3. Four bowls to be played on each end as follows:

- For first five ends - 2 Forehand then 2 Backhand
- For next 5 ends - 2 Backhand then 2 Forehand

4. Record the bowl finish position in relation to the jack. (the visual scoring grid may be used for this exercise)

The Jack

## CHART 9 The Coaches Checklist

| Chart No 9 Coaches checklist for players - Pre-shot to Bowl Delivery. |  |
| :---: | :---: |
| Name: | Date: |
| The Pre Shot RoutineStarting 1 m behind the mat in the direction of the intended line |  |
| 1. Correct laying of the mat for each applicable end. |  |
| 2. Decision as to the bowls objective. |  |
| 3. Take up the bowl in the NON bowling hand:- | (check for suitable size) |
|  | Place bowling hand on top of the bowl. |
|  | Middle finger centred on running surface. |
|  | Index \& 3rd fingers on outer rings. |
|  | Thumb on rings above index finger. |
|  | Little finger allowed to rest on side of bowl. (without pressure) |
|  |  |
| 5. Confirm Bowl objective. |  |
| 6. Establish the correct Line. |  |
| 7. Visualise the shot to be played reaching objective. |  |
| 8. Reconfirm the Line and establish the Focus point. |  |
| 9. Move onto the mat (along the required Line). |  |
| 10. Place the Anchor foot $5-10 \mathrm{~cm}$ from front centre of the mat and pointing along the Delivery Line. |  |
| 11. Left foot adjacent and parallel to the anchor foot. |  |
| 12. Maintain width at base, approx hip width apart. |  |
| 13. Shoulders hips square to line. |  |
| 14. Head centred and still. |  |
| 15. Revisualise shot to be played. |  |
| 16. Reconfirm the Focus Point. |  |
| 17. Body relaxed in a upright/semi upright position:- |  |
|  | Knees slightly flexed, |
|  | Upper trunk slightly forward, |
|  | Weight over balls of feet |
|  | Right arm sufficiently elevated outside body. |
|  | Left hand NOT drawing right hand off square. |
| 18. Attention directed forward at Focus point. |  |
| The Bowling Action - "Pendulum Swing" |  |
| 20. Left heel lifts as right arm passes hip. |  |
| 21. Left foot advances as forward swing commences. |  |
| 22. Step langth dependant on bowl speed. |  |
| 23. Left foot placed parallel to Delivery Line |  |
| 24. Right knee moves slightly behind Left ankle. |  |
| 25. Left arm slides down thigh, rests on left knee. |  |
| 26. Bowl Release at vertical directly UNDER shoulder. |  |
| The Follow Through |  |
| 27. Keep hand aligned BEHIND the bowl during delivery |  |
| 28. Right arm extends along the Line. Palm upwards. |  |
| 29. Stay down on delivery and complete weight transfer. |  |
| 30. Step FORWARD off the mat. Watch the bowl to the destination. |  |

## PART 3 - GAMES

- GAME 1 ROTATING POSITIONS - REDUCED NO OF BOWLS
- GAME 2 TACTICAL \& SHOT SELECTION DRILL
- GAME 3 SUPER CHALLENGE
- GAME 4 TACTICAL - THE PHANTOM BOWLER
- GAME 5 A MAGNETIC BOWLS GAME

## GAME 1 ROTATING POSITIONS - REDUCED NO OF BOWLS

## Use Chart NO. 8

Normally played as a FOURS discipline (four ends per set).
Each player starts with four bowls reducing by one each end.
Players rotate downwards Lead to Skip, Skip to three and so on.
All positions in the team compete with their opposing player for the two points available to the winner in each playing position for each end. (Max 8 points per end.)

The number of shots which are held by the team at the completion of the end being played are also added to this score.

Example above: (only four bowls of each team shown)
On completion of the end Team A have scored 3 points.
2 points for the closest bowl, (A beats $B$ ) plus 1 point for winning this end.

## Clarification - (first end example)

Team A wins the toss \& play first - each player delivers 4 bowls on this end.

| Result after each player plays | Score A | Score B |
| :--- | ---: | ---: |
| Lead A holds shot over Lead B | $\mathbf{2 = 2}$ | $\mathbf{0}=\mathbf{0}$ |
| Second B holds shot over Second A | $\mathbf{0}=\mathbf{2}$ | $\mathbf{2}=\mathbf{2}$ |
| Third A holds shot over Third B | $\mathbf{1 = 3}$ | $\mathbf{0}=\mathbf{2}$ |
| Skip A holds shot over Skip B | $\mathbf{1 = 4}$ | $\mathbf{0}=\mathbf{2}$ |
| At completion of the end Team B holds 1 shot |  | $\mathbf{1 = 3}$ |
| Thus Team A winsthis end | $\mathbf{4}$ | $\mathbf{3}$ |

## Players now rotate - Lead to Skip

Skip to Three
Three to Second Second to Lead And play with three bowls

Then
Rotate positions and play with two bowls
Then
Rotate positions and play one bowl each

## GAME 2 TACTICAL AND SHOT SELECTION DRILL GAME 3 SUPER CHALLENGE

Normal game disciplines, players alternate delivery between the two teams.

Played on TWO rinks with each team initially delivering a jack on one of the two rinks.

Skips to decide which rink their players will deliver their bowl on. Shot selection and accuracy being important.

The Aim is to minimise opposition opportunities whilst maximising own team opportunities.

Example: Mid way through a game

Divide the players in the training squad into two opposing teams.
Each team is to compete against each other with ONE bowl over TWO ends to find a winner.

Can also be called the Super 10, 12 or however many players are taking part.

The Aim is to have the closest counting bowls at the completion of the two ends (set).

## Example:

Mid way through a SUPER 12 game

## GAME 4 TACTICAL - THE PHANTOM BOWLER

## TACTICAL TRAINING With the Phantom Bowler

1. The Phantom Bowler is a coach, acting as the opposition, who places (rather than plays) the opponents bowls on a head. To accomplish this the coach needs enough bowls to match the total number being played by the players under instruction. This allows the team under training to play shots against an opponent whilst being trained in reacting to the various tactical situations.
Team positional play can be coached at the same time as bowling skills are being refined.
2. It should not be the intention of the coach to beat a bowl every time but rather to develop the construction of a head for the benefit of the players being coached.
3. With this type of practical coaching the coach needs to be able to assess the standard of bowls being played and mirror that standard with the bowls being placed. There is the danger for the coach to play the perfect shot too often so coaches using this technique need to be made aware of this.
4. It is best for the first bowl to be placed by the coach as this then means that the skip will have the last vital bowl on each end and be able to play to the head formed by bowls actually played by their own team.
5. Players need the opportunity to test their skills in whatever playing position they may be. For example, if the coach places bowls in a blocking position on the hand that the lead is favouring will the skip then force the lead into playing the other hand against their wishes? Will the lead ask or gesture to change their hand? Or will the lead still draw the shot on the blocked hand? Whatever now results may prove to be a point for discussion at the completion of the end or game.
6. There are no hard and fast rules as to when the coach and the players discuss head building. It is important that everyone involved agree there is not only one correct answer, but, rather it is the result that counts. Where a situation requires discussion and is not to be immediate the coach will need some form of system to accurately record the details for later discussion. A camera being excellent or perhaps make use of a tape recorder.
7. Coaches should be encouraged to develop a series of training requirements. These will need to be either player shot training or tactical head building exercises. Avoid the temptation of being over critical towards any of the players but particularly the skip in relation to either direction of the head or their personal play, a quiet word during the end may point the team in a different direction.

Always finish these sessions with a discussion on what has taken place during the practice sessions and note any refinements and criticisms. Wherever possible the coach should ask questions rather than make statements and ensure that the players do not leave without a clear understanding of the exercise.

## GAME 5 A MAGNETIC BOWLS GAME

# "Lets Play Bowls" 

## A magnetic board game

(Designed to coach player roles and tactics.)

## EQUIPMENT NEEDED:

Magnetic Board- Playing rink outlined.
2 sets magnetic discs (bowls)
Magnetic "mat" and "jack".
A "Shot Dice".

## RULES:

## Participants:

Two teams which may be either drawn or open.
A critique panel that roll the "shot dice" and advise players of the result.
A Controller (coach) who may also act as the umpire.
Any type of game may be played for any duration.
Players advise their playing positions if the teams are not drawn.

## THE GAME:

The "Laws of the Game" apply in respect of control but should any dispute arise the critique panel will determine the action to be taken. Any unresolved disputes are to be handled by the controller/umpire who' decision is final.

Each player in turn, and alternating with their opposition, nominate the shot they wish to play.
It is permissible for the "perfect shot" to be played each time.
The chosen delivery line and intended bowl speed must be declared before each bowl is played.

The critique panel will then roll the dice and advise the player where their bowl is to be placed on the board.
The player now places the bowl in this position on the board.
Play continues until the game is completed.
For training purposes the critique panel may be asked to make comment on the shot selection or tactics employed. It is important for all participants to bear in mind that there is not necessarily any one correct shot, rather, it's the result that counts.

The end results may be recorded if so desired. For coaching purposes the controller may discuss the tactics, choice of shots or other detail at any stage during the game.

See over for Dice shot indications.

## SHOT DICE - INDICATIONS

## FOR ALL SHOTS LESS THE DRIVE

1. Shot achieved desired result
2. Finished short of target by $1-2 \mathrm{~m}$
3. Shot played too fast $4-6 \mathrm{~m}$ beyond target

6. Removed own close bowl

PART 4 - CIRCUIT TRAINING

## SKILLS SESSION - by Ann Muir

8 Rinks used - 4 bowls on rinks 3 to 8
Keep individual scores on a card.
(
1.
$\square$
8 jacks in bucket throw 2 to each marker.
2.

8 Jack throw within 2 m and ditch. Take bucket collect jacks back to rink 1
3.

4.

Backhand

Playing in the $2 m$ zone.
Deliver bowl between cone and Jack 2 infront 2 behind Jack. Two on back -hand 2 on forehand

Raying around a bowl Playing cover shot Draw around a wing bowl to Jack $1^{\text {st }}$ bowl Draw between Jack and bowl 2 m behind $2^{\text {nd }}$ bowl same activity on other hand but move wing bowl.

1. Firm forcing shot

2 Controlled forcing shot
3. Drive one then draw to off line jack

2 bowls backhand
2 bowls forehand

## Individual Competition

Need cards so players keep their score
Have a winner
If you want to make it harder, player stay at rink till they have a $50 \%$ or greater achievement rate.
Players move along rinks Rink 8 goes to Rink 1
Keep actively moving
